DEPOT ROAD NURSERIES

COPE BROTHERS, Props.

Fruit and Shade Trees, Shrubs, Plants and Vines

ON DEPOT ROAD, 1/2 MILE SOUTH PENNA. DEPOT

SALEM,

Phone 1048

OHIO

OUR SERVICE

One of the most gratifying returns for one's life work is the knowledge that he has performed a service to society at large and one's customers in particular. The Depot Road Nursery feels that they have accomplished much by painstaking care in filling their orders, and in the work they have done to encourage and promote the planting of fruit and ornamental plants. The country needs more fruit for its table, and more shrubbery for its home, parks and public buildings, and those who plant not only reap a personal return for their effort and enterprise, but perform a service for humanity.

With a full appreciation of what is needed in the different sections of the country we are offering in this edition of our catalog the selected varieties that will give the most general satisfaction. While in mechanics the genius is enabled to improve immediately his product, in horticulture time and nature alone are the arbitrators, and seldom indeed does the new novelty exceed in value those old standard bred varieties that have stood the test of time. Freshly dug plants delivered to you quickly is rendering a service of which we are proud, and we believe that you should appreciate it by placing your order with us at once.

In the Nursery trade there has grown up a standard of ethics which is observed by all reputable nurserymen, and you are respectfully referred to these terms and conditions when placing your orders:

THE SHIPPING SEASON generally begins from the first to the middle of April in the spring, and about the 15th of October in the autumn.

EARLY ORDERS—To one familiar with the rush at the packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season, with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—place your orders as far in advance of shipping as you possibly can, stating when you would like stock sent.

REPLACING STOCK—We cannot agree to replace stock simply because "it did not grow," as many conditions affect the growth, such as weather conditions, exposure at planting time, lack of knowledge of proper planting, etc., over which the nurseryman has no control after the stock leaves his care. We use great care to get the stock to the planter in good condition, and after that we believe our responsibility should cease, but planters will find that losses will be very small from our stock when conditions are favorable.

TERMS AND CONDITIONS—Cash must come with order unless otherwise specially agreed upon. Make checks, money orders, or bank drafts payable to Cope Brothers. We have arranged to pack all orders free of charge and deliver same to transportation company at which time they are in the risk of the buyer, and all claims for damage because of delays should be presented to the railroad company.

WHEN STOCK ARRIVES—If it cannot be planted at once, it should be unpacked and thoroughly soaked with water, and either placed in a cellar or buried in the ground well covered with earth. If frozen when received, bury the box or bale under the ground, or place in a cellar where it will thaw out gradually. Or stock can be removed and entirely immersed in cold water for a few minutes, which will safely remove the frost.

OUR GUARANTEE—While we use great care to have our stock genuine and true to label, all orders are accepted with the express understanding and agreement with the purchaser, that should any stock prove not true to label, we hold ourselves ready upon proper proof to refund the money paid for it, or will replace with other stock, but shall not be liable to damages other than herein named.

Apples

We recommend the planting of thrifty trees from one to two years old and from 4 to 6 feet high, as such are more safely handled than older and larger trees.

The apple is universally recognized as the most desirable fruit of the United States, because of its great variety of delicious flavors and nutritious qualities. As a commercial crop it cannot be ex-

celled, or for the satisfaction of the family, a well selected orchard of a few varieties is a most desirable investment for any land owner to place on his premises.

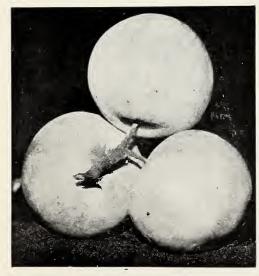

PARENT—The earliest apple; pale lemon color. Bears very young.

SUMMER VARIETIES

EARLY HARVEST—Medium to large size, almost round, bright yellow skin, of good quality and a good bearer.

RED ASTRACHAN—Large and a great bearer; deep crimson; rather sour but fine for cooking.

SWEET BOUGH—Fine size and very sweet; is a good bearer; pale yellow, ripens in August.

Yellow Transparent Apples

FALL VARIETIES

CHENANGO STRAWBERRY—Fruit is oblong shaped and flesh of fine quality, yellow, striped with red, good bearer and fine for eating.

COMMON RAMBO—Medium size; the very best quality, good bearer, fine for eating, streaked with red on sunny side.

DUCHESS—Very hardy; a great bearer, good size, flesh tender and juicy; skin streaked with red and yellow.

FALL PIPPIN—Very large; skin yellow, good quality; valuable for cooking and market.

MAIDEN BLUSH—Large, flat, pale yellow with a red cheek; very beautiful, a good bearer.

OHIO NONPARIEL—Of largest size and the top notch in quality; brings highest market price on account of its beautiful red color, very hardy and valuable.

SMOKEHOUSE—Tree hardy and a good bearer, flesh tender and spicy and cooks well; very desirable.

SWEET WINESAP—Fruit of good size, bright red, good for baking, dessert or apple butter, tree a good bearer; fruit will keep till the holidays.

WEALTHY—Fruit of fair size, almost round and covered with brilliant red stripes, giving it an attractive appearance; tree grows medium size, very hardy and a heavy producer, starting to bear very young, fruit of good quality.

WINTER APPLE VARIETIES

BANANA—Good bearer; fruit perfect in form, golden yellow, good keeper, flesh tender and aromatic, good for dessert.

BAILEY SWEET—Beautiful red all over, good size, flesh tinged with yellow, juicy, quality excellent.

BALDWIN—The old standard. When planted in good rich soil and is properly pruned and sprayed, it has no superior for profit. Fine both for eating and cooking, fruit large, bright red, crisp and juicy. If in doubt what to plant, select Baldwin.

BENTLEY—Medium size; a great bearer, will keep the year round in good condition. Color light red, flesh rather sweet but will cook.

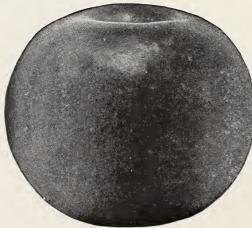

BLUE RAMBO—Very large and great bearer, light blue cast over red stripes, juicy and good.

CORTLAND—A new variety from New York State, a cross between the McIntosh and Ben Davis. It has the hardiness and bearing qualities of the Ben Davis, with the good qualities of the McIntosh. This makes an excellent combination and it is recommended as a variety of great merit.

DELICIOUS—Light red in color, heavy bearer, flesh fine grained, juicy with a delightful aroma, must have good ground and culture or it will be undersize here.

ENSEE—A new variety originating in Southern Ohio. It is believed to be a seedling of the Rome Beauty which it resembles, but is an improvement on it in many respects. The fruit is of better quality and color than its parent and the tree is a better grower in the orchard. It is surely worth a trial.

FALLAWATER (Waldour)—Large to very large with smooth skin, yellow, medium quality, a great bearer.

Rome Beauty

Blue Rambo

FAMEUSE OR SNOW—Fine for dessert, of medium size, striped red; flesh snowy white, delightful flavor.

FLUSHING SPITZENBURG— Great bearer, good size, is rather flat in shape, striped red and good quality.

GATE—Color yellow with oily skin; quality most excellent, a good bearer but tree is rather short lived.

GOLDEN RUSSET—Medium size; round, clear, gold russet with slight blush; very hardy, flesh is tender, crisp and juicy.

GRIMES GOLDEN—Medium to large size; beautiful golden color, highest quality, good bearer.

HUBBARDSTON NONSUCH—Large size, skin yellow mottled with red; flesh

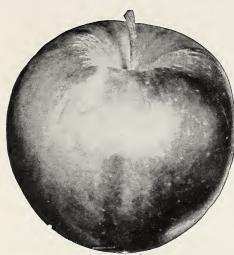

tender, crisp and best quality, a heavy and regular bearer. Oct. to Jan.

JONATHAN—Fine size and most beautiful appearance, pale yellow heavily flushed with red. Profitable for a market sort; very productive, flesh rich and juicy.

KING—Fruit very large, fine shape and color. Flesh crisp and tender, of good quality, very attractive.

McINTOSH—Medium size; very dark red, making fine appearance, one of the most beautiful apples, good quality.

MAMMOTH BLACK TWIG—Very dark red and showy; tree hardy and good bearer. Much like the old Winesap.

Ensee Apple

NORTHERN SPY—This apple has no superior for beauty and quality; a little late in beginning to bear, but is productive after it starts. Very large, striped red next to sun, profitable.

RHODE ISLAND GREENING—A popular market sort from its large size and fine quality; beautiful yellow when ripe, very productive.

ROME BEAUTY—Now being largely planted as a leading market apple; large size, quality excellent, heavy and sure bearer, bright red all over, all combined make it a winner.

ROXBURY RUSSET—An old variety and believed to be the best of the Russet type. Large size, good quality and keeps well.

STARK—A heavy, sure bearer; fruit large, golden green with red stripes on sunny side; flesh yellow, mild sub-acid.

STAYMAN WINESAP—Now rated as the leading commercial apple, bears young, fine size, yellow skin beautifully covered with stripes of red and carmine, good keeper, flesh crisp juicy and best quality. TALMAN SWEET—Very sweet, medium size, color pale yellow, tree vigorous and productive.

WAGNER—Good size, beautiful appearance, bears young, flesh firm and good quality.

WILLOW TWIG—Color dull red, long keeper, flesh yellow and firm, good size and heavy bearer.

WOLF RIVER—Very large, yellow with highly colored red cheks; flesh white, spicy flavor; tree hardy and productive.

YORK IMPERIAL—Very productive and hardy, fruit fine size, smooth skin, yellow flushed with red giving it an attractive appearance; good quality, tree bears young.

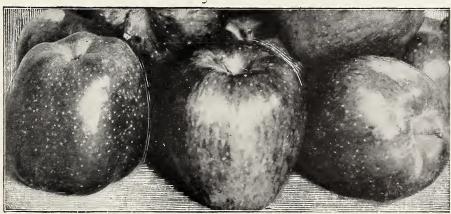

DWARF APPLES

These trees are budded on Doucine stock and grow to 8 to 10 feet in height, bearing very young and fruit of finest appearance. We have the following varieties: Red Astrachan, Banana, Wealthy, Baldwin, Transparent, Delicious, Spy, Stayman, and Jonathan.

CRAB APPLES

HYSLOP—Beautiful crimson, good size, great bearer, used for cider and jelly.

TRANSCENDENT — Beautiful yellow skin, very large, bears young, makes the finest cider and will cook.

Delicious Apples

Choice Varieties of Peaches

YELLOW VARIETIES

ADMIRAL DEWEY—Medium size, yellow peach; good bearer, very early and good. July.

CROSBY—Medium size; flesh yellow and fine quality; heavy bearer, very hardy. September.

EARLY ELBERTA—Resembles the Elberta except that it ripens about a week earlier and is slightly better quality.

ELBERTA—Without question this is the leading commercial peach; very large, is handsome, bright yellow; flesh juicy and so firm that it stands shipping well; hardy and productive. September 1st to 15th.

Crawford in size and color; very good **EARLY CRAWFORD**—Much like late quality; ripens about September 1.

GARY—This is a chance seedling growing on the farm of G. C. Greenisen of Salem, Ohio. It has been producing crops regularly for the past several years, and the fruit is superior to anything else in the peach line that we have ever seen. Of immense size, averaging

about one-half larger than Elberta, and slightly more elongated in shape, skin is yellow covered with bright red, causing it to make a most attractive appearance both while on the tree and in the market

basket. Flesh yellow, firm, and of excellent quality, and ripens about a week later than Elberta. Tree is yet hardy and free from disease, having received no extra care, and all indications are that it surpasses any other known variety in size, color, and quality and will equal the best in productiveness. We are offering a limited stock of this variety this year for the first time.

GOLDEN DROP—Bright, golden, very hardy, good bearer, best quality. September 15.

HALE—Very large, excellent quality, a most beautiful color but seems to be a rather shy bearer, ripens about Sept. 1st. **LEMON FREE**—Very hardy; a heavy bearer, the highest quality lemon shape and color, best peach for home use. Late September.

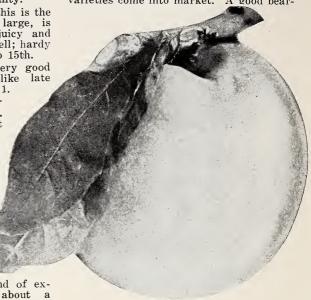

LATE CRAWFORD—Largest size; fine appearance; bears well; valuable market variety. September.

LEMON CLING—Very large; sweet, used for spicing; productive. September.

NIAGARA—A New York variety, ripening just after Elberta; has been well tested and found valuable; good quality, large size; productive. Late September.

KALAMAZOO—Large, golden yellow; small seed, good quality, productive. September.

ROCHESTER—A fine large yellow peach ripening about August 10, before other varieties come into market. A good bear-

Gary Peach

er, fruit juicy and sweet, and one of the earliest freestone varieties.

SALWAY—Our latest peach; very large, creamy yellow with red cheek; flesh deep, rich and sweet, productive. October.

SMOCK—A fine, large variety valuable as market sort, very productive, flesh rich and juicy, fine for canning. Late September.

STEARNS—Very large, yellow flesh and bright red skin; ripens near Oct. 1st, tree a strong grower, hardy and very productive. Fruit has very thick skin and will stand shipping well, an all round good market variety.

SWEET OCTOBER—Very large, extremely late; most excellent quality and good bearer.

WILMA—Said to be very large, of best quality and a great cropper, ripens late.

WHITE FLESHED PEACH VARIETIES

BELLE OF GEORGIA—Very large; skin white with beautiful red cheek; productive. July.

CARMAN—An immense cropper; very beautiful red cheek; large, white with skin very tough, flesh juicy of the best quality; tree hardy, a good market sort. Early August.

CHAMPION—Of the finest appearance; fruit very large and delicious; comes in after Carman; productive; valuable. August 20.

HEATH CLING-Large; creamy white, very sweet; valuable for spicing. October.

MIXON—Large; great bearer; extremely hardy, flesh tender and juicy. Its canning and preserving qualities are unequaled. September.

STUMP—A most beautiful peach; large, red and white skin; flesh rich and juicy, a good cropper; tree hardy. Late September.

Bartlett Pear

Excellent Flavored Pears

BARTLETT—Large, bright yellow with red blush; juicy and highly flavored; productive. September.

B. D. ANJOU—Large; greenish color, very hardy and productive; juicy, rich, vinous. October.

BOSC—Very large, long shaped, russet color, late fall or early

winter season, best quality and productive. CLAIRGEAU—Extremely large size, tree bears young; skin yellow, shaded with crimson, flesh juicy and ex-

cellent. Ripens in September. CLAPP'S FAVORITÉ-Very large; long shaped; beautimul blush next to sun; of good quality; should be

picked green and allowed to ripen in a cool place. DUCHESS—The largest pear; greenish yellow and good quality; succeeds better when grown as a dwarf. October.

FLEMISH BEAUTY—Very sweet; productive and hardy; large and fine. September.

KIEFFER—An immense cropper and very hardy, fine color when ripened properly; a great market

LAWRENCE—Medium size; bright golden yellow, productive and hardy; will keep all winter.

SHELDON—Russet color; quite large; round and of most

excellent flavor,
hardy and productive. September.

SECKEL-A little pear of the best quality; great bearer and hardy, best eating pear. September.

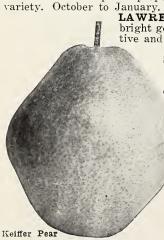

WILDER-Medium size, but a good bearer, and excellent flavor, good grower, fine color, early.

WORDEN SECKEL-Larger and later than Seckel, said to be superior in quality, a heavy bearer and very hardy.

BARTLETT DUCHESS KIEFER CLAPP'S FAVORITE FLEMISH BEAUTY

Dwarf pear trees can be planted where there is not much room, as they make only a small, round top and come into becoming at once, generally the second year.

Plums

ABUNDANCE—Japan variety of fair to large size, cherry red with white bloom; flesh yellow, clings to the seed, a rapid grower and bears young. Ripens last of July.

BRADSHAW—Very large; dark red, flesh green, productive, sells well in market. August.

BURBANK—A Japanese variety, great bearer, fruit large if thinned out, cherry red in color, flesh yellow and firm, and fair quality.

FELLEMBERG (Italian Prune)—Very large and purple; ripens in September; used for drying.

GERMAN PRUNE—The great market sort; sells for highest price, large purple with thick blue bloom, hardy and productive. September.

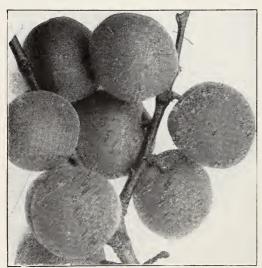

IMPERIAL GAGE—Good size; light green in color, sweet and juicy, productive. August 10.

LOMBARD—Very reliable and a sure bearer; fruit medium to large, dark red, pleasant flavor, thrives almost anywhere. August 20.

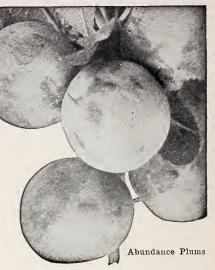

MONARCH—Very large, dark blue with green flesh which parts from the seed when ripe; good bearer, ripens late.

SHROPSHIRE DAMSON—Very productive; the largest of the Damsons, always sells well in market; tree rather slow grower in nursery, fruit produced in clusters. Ripens late. October.

SHIPPERS PRIDE—Very large; dark purple, flesh is sweet and firm, stands shipping well. September.

Shropshire Damson Plums

QUINCES

BOURGEAT—Very large; round, golden color, small core, very productive and will keep well.

CHAMPION—Ripens late; very large;

bears young, good cropper.

ORANGE—One of the largest; productive, hardy; bright golden yellow, fine; flesh firm and good flavor. Early October.

REAS MAMMOTH—Supposed to be a seedling of the Orange, larger in size, excellent.

NUT TREES

SPANISH CHESTNUT—The nuts are very large and find a ready market, tree bears young and is a handsome lawn decoration.

AMERICAN SWEET CHESTNUT—A valuable tree both for its nuts and timber; will grow anywhere and is very ornamental. Every farm should have a grove.

BLACK WALNUT—A native tree growing to a large size, valuable for its timber, and the rich oily nuts are produced in large quantities.

JAPAN WALNUT (Sieboldi)—Very hardy, rapid grower; bears young and is very productive. Resembles the butternut in shape, with smooth and thinner shell.

ENGLISH WALNUT—A fine growing tree with spreading head, producing thin shelled nuts of best quality and always in demand at good prices. Not hardy in the north.

Cherries for the Market

DYEHOUSE—The earliest cherry is a great bearer; the color is bright scarlet, very small seed, excellent for canning.

EARLY RICHMOND—The standard for productiveness and hardiness, fruit is a dark red, large, best for

pie cherry, tree very hardy and productive.

ENGLISH MORELLO—Good size, long shaped, dark red when ripe, flesh solid, rich and juicy, late.

MAY DUKE—Large, dark red, juicy and very rich pulp, tree a great bearer, ripens early.
MONTMORENCY—Very large, bright red, ripens late

when other cherries are scarce; hardy and profitable.

SWEET VARIETIES

BING-Is well recommended as a cherry of large size, delicious flavor; color is almost black, very solid meat; ripens late.

GOV. WOOD—A most prolific bearer; fruit is large, round, color yellow mottled with red, very hardy and profitable.

LAMBERT—Very large, jet black when ripe, very firm, sweet and juicy and a heavy bearer.

NAPOLEON (Royal Ann)—Fruit large, very solid, pale yellow when ripe. Late.

ROCKPORT BIGAR-REAU—Large, light red, erect grower, very sweet and juicy, good bearer, early.

SCHMIDT—Fruit in large clusters, color jet

COMPASS CHERRY PLUM

COMPASS CHERRY PLUM-Is a cross between the Minor Plum and the Sand Cherry. Fruit some larger than an ordinary cherry, almost purple in color with a tinge of red, flesh yellow and good and fruit can be used for eating or cooking, tree seems hardy and productive, but is recommended more for home use than a profitable market.

black, large size, sweet and juicy. July. Hardy and productive.

SIDNEY—Originated from a chance seedling in this county, is a beautiful red, very large size and abundant bearer. The only red sweet cherry that is really valuable that we know of. The original

tree has produced 14 bu. of fine cherries in one season, does not rot easily, ripens last of June.

Tartarian

TARTARIAN—An old variety that is still popular; cherries of the largest size, black in color, ripens late.

WINDSOR-Fruit large, liver colored, flesh firm and good quality, tree hardy and productive.

YELLOW SPANISH—Large, pale yellow, flesh solid, sweet and juicy, tree vigorous and productive. Good market variety and will ship well. June.

Montmorency

Thrifty Grapes

AGAWAM-Very large; dark red, sweet. and early.

BRIGHTON—Large bunch, bright red, very sweet.

CACO—A cross between the Concord and Ca-

tawba, thus insuring hardiness and productiveness, without the defects of either its parents. Color a rich wine red, quality the highest and most delicious, strong grower and is free from disease.

CAMPBELL'S EARLY—Very large jet black, sweet and productive. Early.

CATAWBA—Very large; coppery red, the best wine grape.

CONCORD—Fine size, black, succeeds everywhere.

DELAWARE—Small fruit but fine vinous flavor; slow grower

GREEN MOUNTAIN—Very early, medium size, thin skin but superb quality.

MOORE'S EARLY—Very large, black, ripens early.
NIAGARA—Large bunches, color white;

excellent quality.

SALEM—Large, bright red; juicy and

sweet. Late. **WYOMING**—Large; bright red; is very sweet. Early.

POCKLINGTON—Large; is golden yellow; late; keeps well.

WORDEN—Resembles Concord except it is a week earlier.

CURRANTS

BLACK NAPLES -Is very productive, large bunch, the best black currant. CHERRY—Berries very large; requires

good soil, red.

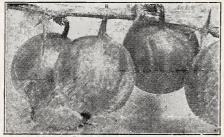

FAY'S PROLIFIC—The bunches are

large; very productive; red.

PERFECTION—Bright red in color, large size and best quality.

WHITE GRAPES—The best white current. Mild flavor.

LONDON MARKET—Very large bunches, heavy cropper, foliage remains bright green, good market variety.

Downing Gooseberries

Concord Grapes

GOOSEBERRIES

CHAUTAUQUA—Very large, beautiful light yellow, very sweet and fine.

DOWNING—Pale green; sweet, fair size. **PEARL**—Medium, greenish, very sweet and productive.

RED JACKET—Large, free from mildew. productive.

APRICOTS

EARLY GOLDEN—Medium size, nearly round, skin smooth, flesh yellow, juicy and sweet, hardy and productive.

MOORPARK—Fruit large, yellow with numerous dots, flesh sweet and rich, productive.

PERSIMMONS

This tree is found growing wild in many parts of the country, and produces a fruit of a puckery nature, but if allowed to become frosted the flavor is much improved. The tree makes a neat round head with bright shiny leaves, to gether with its attractive fruits makes a good ornamental tree.

NECTARINES

This fruit resembles the peach except it has smooth skin like the plum. It has part of the flavor of both peach and plum. Tree makes a good growth of neat appearance. We have two kinds, the Red Nectarine and White Nectarine.

Deciduous Shade Trees

ALIANTHUS (Tree of Heaven)—A good grower, has large palm-like leaves, and will grow in places exposed to gas and smoke.

AMERICAN ELM—Grows to 100 feet tall; has a wide, open top, excellent for avenues, where it succeeds well.

AMERICAN LINDEN—A stately tree growing to 60 feet high; valuable both as an ornamental and for its wood, makes a fine appearance.

BECHTEL'S DOUBLE FLOWERING CRAB—A small bushy tree, valuable for its flowers produced in great abundance and very fragrant.

EUROPEAN MT. ASH—A rapid growing tree, growing large with spreading habit, darker foliage than the American Ash, and has a good ornamental effect.

LARCH (Tamarack).—Will grow in any kind of soil. Opens its buds very early in the spring, and leaves turn a golden color late in the fall. A hardy, upright, strong grower.

NORWAY MAPLE—Forms a compact round head, of a fairly rapid growth; to 40 feet high; valuable for lawn or park.

SILVER MAPLE—The most rapid growing of all shade trees; foliage bright green and grows to a large size; very hardy.

THORN, PAUL'S FLOWERING—A small quick growing tree producing masses of most beautiful double crimson flowers in May, followed by large red berries in late summer.

WEIR'S CUT LEAP MAPLE—Delicately cut leaves and long, half drooping branches cause an unique appearance; a rapid grower, becoming very large and spreading.

ORIENTAL PLANE (European Sycamore)—A graceful, wide-spreading tree, grows rapidly to 80 feet tall; large, leathery leaves, turning yellow in the fall.

CATALPA SPECIOSA—Makes a rapid growth; has large leaves; grows to a large size, being planted for posts,

PURPLE BEECH—A medium size tree, excellent for lawn decoration. Leaves are very showy, deep purple in the spring, changing to dark green in the fall.

American Elm

HORSE CHESTNUT (Buckeye Tree)—A handsome tree for lawn or street planting, produces long spikes of white flowers; very hardy and a good grower.

POPLAR—This variety of tree is a rapid grower, making an effect in a short time, and when planted where the roots will not clog sewers the tree is very ornamental. We have the Carolina, Lombardy, and Silver Poplar.

PIN OAK—Leaves are deep green and glossy, turning to gold in the fall, growing faster than any other oaks and makes a beautiful tree.

PRUNUS PISSARDI—Purple leaved plum, distinct little tree and very showy, covered with leaves that deepen in color to the end of the year.

RUSSIAN OLIVE—Wood is very hard and burns like a candle, tree grows 15 to 20 feet high, light green foliage, yellow flowers followed by yellow berries.

TULIP—A tall growing tree with bright glossy leaves, turning bright yellow in the fall, large flowers in early spring, bark light grey color.

WILLOW (Laurel Leaf)—Grows to medium size with green bark and bright shining leaves, very bushy and can be pruned to different shapes.

WISCONSIN WEEPING WILLOW—A large and rapid growing tree, very hardy, branches long and drooping. Same as Babylonica Willow.

CAMPERDOWN ELM—Long, drooping branches; forms a broad, handsome head.

CUT LEAVED WEEPING BIRCH—A most graceful tree of rapid growth, reaching 60 feet; bark white.

CATALPA BUNGEII—Not a weeping tree but is grafted on stems 5 to 8 feet from the ground, forming an umbrella shaped top; very ornamental.

TEA'S WEEPING MULBERRY—Is grafted on a straight stem 5 to 6 feet from the ground, the branches droop down. **WEEPING MOUNTAIN ASH**—Has long, slender branches; and white flowers in May followed by clusters of bright red berries.

Norway Maple

SELECTED EVERGREEN STOCK

For a good windbreak, or to hide some unsightly spot, nothing can equal our hardy evergreens. By massing a number of kinds on the lawn, or even using a single specimen, a most ornamental effect is produced and these deservedly popular trees are coming into favor again. We have a choice selection of the best varieties.

Fir)—Long CONCOLOR (Concolor leathery leaves, branches beautifut foliage tinged with blue, very fine. branches beautifully arranged,

BLACK HILLS SPRUCE (Picea Canadensis)—Very hardy, compact and bushy, foliage varies from green to bluish tints.

KOSTER'S BLUE SPRUCE (Pungens Kosteriana)—Most beautiful dwarf spruce grows very compact and always makes a fine show.

NORWAY SPRUCE (Excelsa)—A tall-growing tree of imposing appearance, but is one of the tree of imposing appearance, but is one best evergreens for a hedge if kept pruned.

WHITE SPRUCE (Picea Alba)—Foliage light green, compact and upright growth, resists cold and drout.

AMERICAN ARBORVITAE (Occidentalis) An erect grower but can be trimmed to any desired effect, foliage light green.

COMPACTA (Parson's Compact Arborvitae) Foliage light green, growing compact and solid, very dwarf and slow grower.

DOUGLAS GOLDEN (Thuya Douglassi)—Beautiful golden color, good grower and bushy appear-

GEORGE PEABODY (Lueta) -A dwarf growing beautiful golden leaved Arborvitae, is showy and fine.

-Grows a round head naturally, has dense light green foliage and is of the Arbor-

vitae type. HOVEY'S GOLDEN—A small growing Arborvitae, foliage light green with golden tinge and

and very compact. PYRAMIDAL ARBOR VITAE (Thuya Pyramidalis)—Grows in narrow pyramidal shape, fine

midalis)—crows in harrow problems, good grower.

RETINISPORA (Plumosa)—Makes a neat round head with feathery light green foliage; makes a nice show as a single specimen.

(Plumosa Aurea)—This ever-

RETINISPORA (Plumosa Aurea)—This ever-green is fine for massing as it has a bright golden foliage that holds its color.

HILLS SILVER JUNIPER—Beautiful silvery blue foliage. Very compact and upright grower, keeps its color good.

IRISH JUNIPER-Makes an upright growth like a column, foliage deep green and very compact; makes a nice effect in a cemetery.

PFITZERIANA JUNIPER — Branche s grow straight out from stems, foliage dark green, almost blue, grows about 10 feet high.

SAVIN JUNIPER—Low and spreading open top, dark green foliage, can be pruned to different shapes.

VIRGINIA JUNIPER (Red Cedar)—Pyramidal shape, foliage light green to darker shade, fine dense foliage, hardy.

SCHOTTI JUNIPER—A vigorous grower, foliage light green, grows upright and makes a neat dense form.

AUSTRIAN PINE (Pinus Austiaca)—Rapid grower, long leaves, very hardy, foliage rich dark green.

MUGHO (Dwarf Pine)—Very distinct, foliage light green, does not grow tall, but spreads out assuming a globular form; stays close to the ground.

SYLVESTRIS (Scotch Pine) -A rapid grower 80 feet, long silvery needles, fine appearance, good

HEMLOCK (Abies Tsugo Canadensis)—A neat growing tree with dark green foliage and branches slightly drooping, forming a pyramidal head, with graceful upright growth.

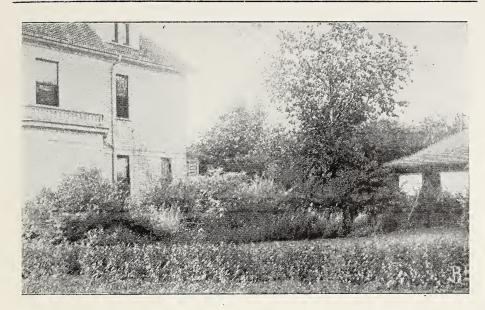

BALSAM FIR (Abies

Balsamea)—Makes

BALSAM FIR (Ables Balsamea)—Makes a handsome lawn specimen foliage quite fragrant, dark green above and silvery beneath.

DOUGLAS FIR (Ables Douglassi)—Is compact and symmetrical in growth, silvery blue foliage, grows quite large but should have a place in evergreen groupings.

TAXUS CUSPIDATA (Japanese Yew)—Foliage very dark green, short leaves, dwarf grower, very compact, the best Yew tree.

Ornamental Flowering Shrubs

A few shrubs planted at advantageous places or added to those already placed will improve the appearance of your grounds and at the same time increase its realty value immensely. We list only those plants that are recognized as the best.

ALTHEA (Rose of Sharon)—A profuse bloomer late in the summer, small rose-like flowers in the different colors, double pink, double white, double red, and double purple.

BUTTERFLY BUSH (Buddleia)—Might be called a summer Lilac, usually dies down in winter but quickly starts up in the spring, and in July is a large bush cov-

ered with long spikes of flowers resembling the Lilacs, and with a delightful perfume.

CALYCANTHUS (Sweet Shrub)—Produces fragrant flowers of chocolate red; the old fashioned shrub that will always have its place in the garden and in landscape groupings.

CHIONANTHUS (White Fringe)—Has dark green foliage with snowy white flowers early in the summer.

CLETHRA ALNIFOLIA or (Sweet Pepper Bush). White flowers on long panicles, very fragrant, continuing to bloom through July and August, makes a small dense bush.

CORNUS ELEGANTISSIMA VARIEGATA—Small shrubs, red twigs, leaves colored with a mixture of green and white, very attractive.

CORNUS FLORIDA (Dogwood)—White flowers come early in the spring before the leaves appear, covered later in the fall with bright red berries; foliage green and glossy turning crimson in the fall.

CORNUS LUTEA (Dogwood)—Bright yellow bark, making a fine effect with its green leaves in summer.

cornus rubra (Dogwood)—A small growing tree producing flowers of a bright red early in the spring.

cornus sibirica (Dogwood)—Twigs are blood red and always make a fine appearance; has white flowers in the spring followed by a crop of red berries.

CORNUS STOLONIFERA (Dogwood)—Grows medium size, spreading top, has red bark and white berries.

DEUTZIA CANADISSIMA
—Double white.

Cornus Lutea

DEUTZIA CRENATA—Double white with pink stripes.

DEUTZIA LEMOINEI—Dwarf growing, flowers white, very large.

DEUTZIA, PRIDE OF RO- CHESTER—One of the best, a strong grower, flowers large and pure white.

EUONYMUS ALATUS (Winged Burning Bush)—Branches are corky, some being almost square, leaves turning red in autumn, and makes a fine effect either in a group or as a single specimen.

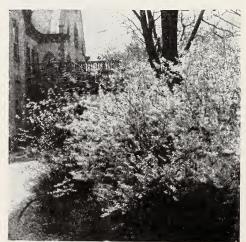

EXOCHORDA GRANDI-FLORA (Pearl Bush)—Flowers are dazzling white and showy, the early buds resemble pearls strung on the limbs.

FLOWERING ALMOND —A double pink flower very early in the spring.

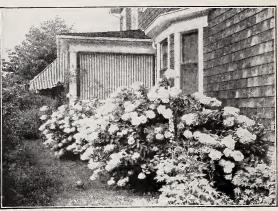

FLOWERING CURRANT—Has bright yellow fragrant flowers, very early in the spring.

FORSYTHIA (Golden Bell)—Blooms early in the spring before the leaves appear, the yellow flowers come out close along the green bark of the body and limbs in great numbers We have the Virdissima and Fortunei, both yellow.

GOLDEN ELDER (Sambucus Aurea)— Leaves golden yellow in the sun, very fancy and ornamental in contrast with other shrubs.

Forsythia

Hydrangea Arborescens

HIGH BUSH CRANBERRY (Opulus Viburnum)—A large bush form shrub with dense green foliage, single white flowers in May followed by red berries.

HONEYSUCKLE (Lonicera)—Bush form covered with bright green leaves very early in the spring followed by numerous flowers varying in the different shades of pink, some of which are very fragrant.

HYDRANGEA ARBORESCENS (Hills of Snow)—Grows into a round bush with masses of large white flowers resembling snowballs in shape. Does not grow as tall as the other Hydrangea, and makes a neater shrub.

HYDRANGEA PANICULATA GRAND-IFLORA—Is a strong grower and produces profuse masses of huge white blooms in August, which later turn pink and remain till winter. We also have this Hydrangea in tree form where this effect is desired.

JAPAN QUINCE (Cydonia Japonica)— Large masses of bright pink flowers very early in the spring, followed by small quince shaped fruits which are fragrant.

KERRIA JAPONICA—Grows to medium size, branches are light green and produce single yellow flowers from June till October.

KERRIA WHITE (Rhodotypus Kerrioides)—Flowers pure white in May, followed by bright black berries which remain all winter.

LILACS (Syringa)—Very hardy shubs producing masses of fragrant flowers early in the spring, and are noted for their beauty. We have these shrubs in the different shades of red, pink, purple and white in named varieties.

RHUS (Sumac)—Tall growing shrubs of great hardiness, noted for their leaves, fruits and flowers. We have several varieties including Glabra or smooth Sumac, Copallina or Shining Sumac and the Cotinus or Purple Fringe, also known as Tree.

snowball (Viburnum)—Short shrubs that bear pure white balls of flowers in great profusion, generally in bloom for Decoration Day. We have the common Snowball and the Japan Snowball both good varieties.

SNOWBERRY (Symphoricarpus)
—A small growing shrub, very hardy and will grow in dense shade; small white flowers appear in June followed by white waxy berries which remain all winter.

SNOWBERRY. (Indian Currant) —Very compact grower, the limbs of which are simply lined with bright berries remaining all winter.

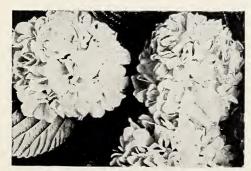

SPIREA ANTHONY WATERER — A dwarf growing shrub which has profuse masses of bright crimson flowers in July and August.

SPIREA BILLARDI—Flowers are pink, good grower, blooms late.

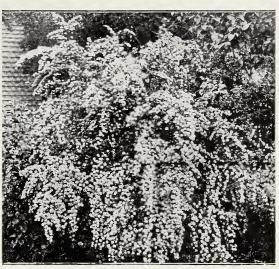

SPIREA FROEBELI—Dwarf but a better grower than A. Waterer, a great bloomer, flowers bright crimson in July and August.

SPIREA GOLDEN—A tall strong growing shrub with double white flowers, the foliage being a bright yellow in the spring, changing to golden brown in the fall.

SPIREA THUNBERGII — Flowers of feathery appearance very early in the spring, while it leaves form a dense feathery bush.

Snowball

Spirea Van Houttei

SPIREA PRUNIFOLIA—Very handsome shrub, with dark green shining foliage, turning orange in the fall, flowers large and pure white.

SPIREA VON HOUTTEI—Produces a mass of pure white flowers in June; very showy and one of the best shrubs for general use in cultivation; can be used as a hedge, in clumps, or as a background for display.

SYRINGA GARLAND (Mock Orange)—Noted for its fragrant white flowers in June which resemble real orange bloom, also makes a neat shrub.

SYRINGA GOLDEN—A dwarf growing shrub of striking beauty with its bright golden foliage, which holds its color well through the season and when planted with other shrubs or in clumps the effect is very pleasing.

SYRINGA LEMOINE-Dwarf growing variety, but good bloomer.

SYRINGA VIRGINALIS—Flowers very large and fine, good grower, great bloomer, tall growing.

TAMARIX HIPPINA—A tell growing shrub with feathery blue foliage and pink flowers late as summer.

WEIGELIA CANDIDA—Strong grower, pure wante flowers in June.

WEIGELIA PLORIBUNDA—An excellent variety of this popular shrub, good grower, and blocms e vy, color bright crimson.

WEIGELIA EVA RATHKE—A most profuse bloomer, dark crimson, distinct and fine.

WEIGELIA ROSEA—A medium tall growing vigorous shrub, flowers produced in profuse abunnung June and in smaller amount in late summer.

WEIGELIA VARIEGATED LEAF—Leaves are beautifully bordered with yellow, very distinct and ornamental.

YUCCA FILAMENTOSA—Has long sword-like leaves which remain green all winter and give it a tropical appearance, and white flowers on long stems come in June.

Choice Selection of Roses

No other flower can be compared to the rose, for its color and fragrance dominate all other shrubs, at the same time having a wide range of growth such as the climbing bush and dwarf varieties, each bring forth its blooms at various periods. list only those varieties of each class that have proven their worth.

CLIMBING VARIETIES

AMERICAN PILLAR—Roses are single, very large, apple blossom pink, strong grower and holds its foliage well in the fall.

CLIMBING SUNBURST—Good grower, rich yellow flowers.

CRIMSON RAMBLER—A rank grower, immense quantities of bloom, very hardy, roses grow in clusters.

DOROTHY PERKINS-Shell pink, good foliage, profuse bloomer.

DR. VAN FLEET—Flowers on long stems, of delicate white, fine form.

EXCELSEA—Color a deep crimson, grows in large clusters, very double and produced in immense quantities. A rampant grower and is almost an evergreen.

FLOWER OF FAIRFIELD-Much like Crimson Rambler except it blooms at intervals all summer, good foliage.

MARECHEL NEIL—Bright yellow and very fragrant, roses large.

SILVER MOON—Roses are very large, pure white, yellow stamens, very good foliage.

TAUSENDSCHON (Thousand Beauties)—Just what its name indicates, rapid grower, light pink changing to carmine.

HYBRID PERPETUALS

This class of roses is very hardy and will withstand our winters without protection, and in many respects are as desirabe as any other class, except their blooming season may not be quite so extended, or the roses may not be produced in such great numbers; the greater part of their blooming is done in July and August.

Crimson Rambler

Frau Karl Druschki

AMERICAN BEAUTY—An old fashioned crimson rose, fine form, good bloomer.

FRAU KARL DRUSCHKI—A grand white rose, purest white without a tinge of any other color; hardy as an oak, roses large, fine form and produces in great quantities.

GENERAL JACQUEMINOT—Familiarly known as "General Jack," large and full, color rich dark crimson, very fragrant, the best of the older sorts.

GEORGE AHRENDS-The pink Frau Karl, most beautiful delicate pink, best form, very hardy, the very best of its kind without question.

GEORGE DICKSON—Dark velvety crimson or almost black, largest size.

GRUSS AN TEPLITZ—Bright crimson with fiery red center, the greatest bloomer of all.

General McArthur

HERMOSA—Bright pink, good form, loads with attractive roses.

KILLARNEY—Buds long and pointed, roses bright pink, fragrant, good form.

LA FRANCE-Rosy pink, an old favorite for the garden.

M. P. WILDER—Deep, rich red, large, full and well formed.

MRS. JOHN LAING-A clear bright pink, well shaded, free bloomer, fragrant.

PAUL NEYRON—Deep pink, great bloomer, the largest rose in cultivation.

PERSIAN YELLOW—Bright vellow, fragrant, grows shrub form.

ULRICH BRUNNER—Cherry red , is very large and attractive.

HYBRID TEAS AND **EVERBLOOMERS**

This class of roses usually needs winter protection; this can be easily provided by making a mound of earth a few inches up the bush, or if the bush be large, the use of cornstalks, straw, or burlap tied tightly around the bush will afford the necessary protection. This must be removed in the spring when danger of freezing is past. These roses bloom for a longer season than the Perpetuals, and are the true Everbloomers.

BETTY-Coppery yellow, fine form, good bloomer.

COLUMBIA—Glowing pink, the color deepens as the rose opens, very large, continuous bloomer.

GENERAL McARTHUR—Dazzling red, well formed, a grand all round rose.

KAISERIN AUGUSTA VICTORIA-A creamy white, fragrant, full and very double.

LADY HILLINGTON-Brilliant golden yellow, buds pointed, very attractive.

LOS ANGELES—A new creation from California, and the grandest all round rose ever introduced. Bush is strong growing, hardy and vigorous bloomer.

MADAME BUTTERFLY—A combination of pink, yellow and gold; perfect form, of delicious fragrance, large and very double.

MRS. AARON WARD—Rich creamy yellow, deeply cupped, very large and fragrant.

OPHELIA—Salmon pink, yellow at base of petals, is very large, on long stiff stems.

PREMIER—Pure rose pink, large and very

ragrant, almost thornless; free.

RADIANCE—Great bloomer, beautiful carmine pink, vigorous and hardy.

RED RADIANCE—Much the same rose as Radiance except it is a more brilliant crimson.

SUNBURST—The deepest golden of all other roses; great bloomer, large, full, fragrant.

TESTOUT—Always in bloom, light pink with silvery edging.

silvery edging.

rose.

MOSS ROSES

CRESTED MOSS—Deep pink, well mossed. **SALET**—Light Rose color, late fall bloomer.

DWARF OR "BABY ROSES"

This class of roses is very hardy and thrifty, and does not need winter protection, making only a small dwarf bush, but are great bloomers, much like the Everbloomers except the roses are smaller.

BABY RAMBLER—Pink roses, always in bloom.

CATHERINE ZEIMET—The white Baby Ramb-

ERNA TESCHENDORFF-Very deep crim-GEORGE ELGER-The only dwarf yellow

RUGOSA

Useful for hedge or in groups of shrubs, the foliage being heavy and dark green.

RUGOSA ALBA—White.

RUGOSA RUBRA—Red.

Madam Butterfly

PEONIES

These most beautiful flowers are easily grown, require little care and when once established will make their presence known every year for almost a lifetime. The following varieties we believe are among the best.

COURONNE D' ORR—White reflecting yellow, center carmine.

DUCHESS DE NEMOURS—Large and full, pure white.

FELIX CROUSSE—Brilliant red, ruby center, late.

FESTIVA MAXIMA — White, very large on long stems.

FRANCOIS ORTEGAT — Glistening crimson.

HUMEI—Late, silvery pink.

MONS. JULES ELI—Beautiful blue pink, large and fine.

MME. DUCEL-Pink, one of the best.

RUBRA SUPERBA—Late, dark red, long stems.

CLIMBING VINES

BOSTON IVY—Will climb over any surface without support, clinging to solid walls.

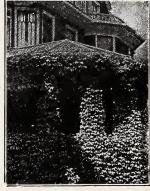

CLEMATIS COCCINEA — Light red, bell shaped flowers and blooms from June till frost.

CLEMATIS MADAM ED-ANDRE—Bright red, large flowers, good bloomer.

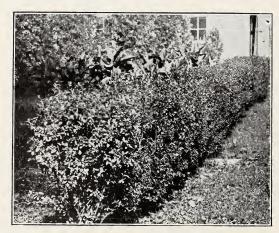

CLEMATIS PANICULATA

—The most vigorous climber

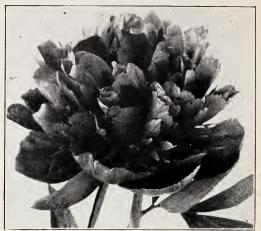

and bloomer, being completely covered with small white

Boston Ivy

Barberry Thunbergii

Rubra Superba

flowers in September. Very fragrant; will grow anywhere.

CLEMATIS JACKMANNI
—Dark purple; very large.
Forms a perfect mass of the richest blooms.

DUTCHMAN'S PIPE— A hardy vine of rapid growth; very large leaves, flowers brownish and resemble a pipe. HALLEANA HONEY-SUCKLE—Great climber and very beautiful, producing a very fragrant flower of a delicate yellow.

SCARLET TRUMPEET HONEYSUCKLE— Flowers trumpet shaped, bright scarlet.

WISTERIA (Chinese)—A hardy, rapid climbing vine with pale foot-long clusters in May. Color purple.

HEDGE

BARBERRY THUNBERGII — A dwarf shrub of neat and graceful form; makes a good hedge; requires little care in trimming and is very hardy.

CALIFORNIA PRIVET—The best for hedge, thrives almost anywhere. It has no thorns, does not sucker from the root and can be trimmed to any desired shape or height.

IBOTA PRIVET — Grows more spreading than the California Privet, but where extreme hardiness is desired it is the best variety, as it will stand the coldest winter without damage.

CROCUS, DAHLIAS, LILIES AND TULIPS

We expect to have a stock of these bulbs in season in the different varieties and colors, as the best results are received from imported stock.

GLADIOLI

Gladioli should be taken up in the fall and stored in the cellar like potatoes. Very handsome summer flowering bulbs, coming into bloom during July and August. We can supply a number of the best named varieties in the different colors.

PERENNIALS

PHLOX-A brilliant annual flower continuing to grow and bloom from middle of June till fall, grows 2 to 3 feet high, thives best in open sunny spots, easily grown and very hardy. We have four colors, white, pink, red and purple.

AQUILEGIA (Columbine)—Blooms in the early summer, remaining for a long season,

colors are white, pink, and blue. **CAMPANULAS** (Canterbury Bells)—Grow 3 feet high, flowers in June, bell shaped, colors are pink, wwhite, and blue. CHRYSANTHEMUM—Blooming late in

the fall, hardy out-door plants, better known as fall roses, colors are pink, red, white, and yellow.

DIANTHUS BARBATUS (Sweet William) —Pink flowers in June and July, fragrant.

Delphinium

DIGITALIS (Fox Glove) — Thimble shaped flowers on long stems, white. July.

DELPHINIUM (Larkspur) — Tall growing plants producing flowers of great beauty in the different shades of blue only.

HIBISCUS (Mallow Marvels) - Grows 3 to 5 feet in height, large leaves and flowers are delicate color, pink and red.

HOLLYHOCKS—Will grow almost anywhere without cultivation; great bloomers, the long stems being completely covered with flowers, colors are white, red, yellow and pink.

IRIS—Small growing plants with flowers of different shades of yellow and blue.

PAPAVER ORIENTAL (Oriental Poppy) Pink or crimson flowers, very large, early in the summer, great beauty.

RHODODENDRONS

These are very popular plants for the all-year-round garden, as they retain their foliage the entire year and provide a touch of green to the scene. They will thrive in most soils free from limestone, and favor a partially shaded location, making them invaluable for decorating around the house foundation or on the lawn. The flowers are beautiful, and come in light pink, purple or light red. The Mountain Laurel (Kalmia Latifolia) is a good plant to use in connection with the Rhododendron, having small evergreen leaves and white flowers. We also have a stock of Hardy Azaleas which are tall growing shrub-like bushes producing flowers in great numbers in the different shades of white, yellow, and pink.

ASPARAGUUS

PALMETTO—Very valuable sort, large stocks and free from rust.

RHUBARB

MYATTS LINNAEUS—This is the best variety for general use, large stalks or stems, early, tender and good cooker.

BLACKBERRIES

for food.

SNYDER—Very hardy and productive; a great cropper and the most reliable market sort. Medium early.

ELDORADO—Very large and pet black, sweet, with no hard core; vine hardy and productive.

BLOWER—Hardy and productive; very large and good quality; fine color and good shipper.

RASPBERRIES

KING (Red)—Very early, firm and good quality, strong grower, large size, hardy and productive.

ST. REGIS (Red)—An everbearing sort that is well recommended; extremely prolific, berries large, firm and a good shipper. Bears the first season.

CUTHBERT (Red)—Very hardy and a good market sort; strong, upright grow-

ers, best quality, very productive.

KANSAS (Black)—Jet black in color, of good size, very hardy and immense cropper.

CUMBERLAND (Black)—The largest of the black caps; good quality, firm and a good shipper. Bush is hardy, a good grower and productive.

MULBERRIES

DOWNING- Very productive; fruit large and ripens all summer; black, sub-acid. RUSSIAN-Vigorous and hardy in growth; good for windbreaks or other protection; fruit small but produc-

ed in immense quantity.
NEW AMERICAN—Very hardy tree, is vigorous grower and a great producer of excellent fruit. June till Fall.

STRAWBERRIES

Varieties marked imperfect will not bear when planted alone, must have a Perfect bloom planted at least every third row. Varieties marked Perfect will bear when planted alone.

SENATOR DUNLAP (Per)—A rampant runner, producing immense quantities of dark red berries, firm and good flavor; of medium early

SAMPLE (Imp)—Berries continue large to the last, colors all over at once; a good producer; one of the most profitable; ripens midseason.

PARSON'S BEAUTY (Per)—Good both for home use and market, fruit large, is bright red to the center, medium early and well flavored, plants vigorous and strong growers.

PREMIER (Per)—Fruit large, very ear-

ly, well colored, good quality, plant is a strong grower and good producer.

WM. BELT (Per)—Most excellent quality; large size, bright red, good producer and shipper; ripens late.

PROGRESSIVE (Per)—This is an everbearing variety and has proven to be the best one for this purpose. Berries begin to ripen in June and they continue until frost. Dark red and glossy; of good quality; hardy.
